(54) Title: ENCODING DYNAMIC GRAPHIC CONTENT VIEWS

(57) Abstract: This invention relates to processing of dynamic graphic content, more particularly, to a method for pre-processing dynamic graphic content, a corresponding decoding method, and an apparatus for the same. The pre-processing method of the invention comprising: encoding a view in which all of the plurality of dynamic elements being in a first state as a reference picture; encoding the views in which at least one of the plurality of dynamic elements being in a state other than the first state as differential pictures with regards to said reference picture, to form a differential picture sequence; multiplexing said reference picture and said differential picture sequence together, and providing the result video signals. The method allows significant bandwidth and memory savings with only minor modifications to the user device.
